Gateway Controller Project Roadmap

Sprint 1

- -Draft IoT Gateway top-down design
- -Iterate REST API interaction top-down design
- -Draft Gateway component subsystem design

Sprint 2

- -Integrate IoT Gateway with CIC (Gateway Heartbeat)
- -Iterate gateway diagnostics integration
- -Iterate REST API integration

Sprint 3

- -Draft data processing of sensor array (Analytic foundation)
- -Iterate IoT Gateway to send refined data
- -Intensify greybox integration testing

Sprint 6

- -Finalize whitebox testing of Gateway CPU
- -Prepare IoT Gateway for demo

Sprint 5

- -Intensify whitebox testing of Gateway CPU
- -Finalize data processing from data array
 - -Finalize/blackbox test IoT Gateway data send

Sprint 4

- -Finalize greybox integration testing
- -Iterate data processing from sensor array
- -Create test cases for whitebox testing of Gateway CPU
